PROJECT

Elevate - Job Portal

- **Tech stack:** Java, C#, .NET Core Web API, Entity Framework, Spring Boot REST API, Microservices, React JS, MySQL, GitHub
- Elevate Jobs is an accessible job board that aims to empower disabled job seekers by offering an accessible and streamlined job search experience. It connects employers and job seekers, allowing users to browse listings, apply for jobs, and track applications easily.
- The site allows employers to create profiles, post jobs, screen candidates, and communicate with potential hires. Job seekers can highlight their skills, preferred roles, and accessibility needs while using advanced search filters to find suitable opportunities.
- Built with ReactJS, Spring Boot, Spring Framework, Hibernate, and MySQL, Elevate Jobs ensures scalability, security, and efficiency.
- It uses ASP.NET Core Web API with a database-first approach, role-based access control (RBAC), and cascading delete functionality to ensure data integrity.
- Elevate Jobs promotes workplace inclusivity by bridging the gap between talent and opportunity for diversity in the workforce.
